

CELLULOSE CHEMISTRY AND TECHNOLOGY

ADVANCES IN THE CHEMISTRY, PHYSICS AND TECHNOLOGY OF
POLYSACCHARIDES AND LIGNIN

50♦2016

7 - 8 ♦ JULY - AUGUST

C O N T E N T S

- M. ENAMUL HOQUE, ARSALAN MAROOF KHAN, N. SABA, M. S. ISLAM, M. ASIM, M. JAWAID and OTHMAN Y. ALOTHMAN, Effects of natural degradation on the mechanical and morphological properties of tropical woods723-730
- M. JABLONSKÝ, A. HAZ, A. ŠKULCOVÁ, L. DUBINYOVÁ, I. ŠURINA, F. KAČÍK and D. KAČÍKOVÁ, Products of nitrobenzene oxidation from non-wood lignin isolated by sulphuric acid.....731-735
- E. CORRADINI, E. A. G. PINEDA, A. C. CORRÊA, E. M. TEIXEIRA and L. H. C. MATTOSO, Thermal stability of cellulose nanocrystals from curaua fiber isolated by acid hydrolysis737-743
- KARTICK K. SAMANTA, T. N. GAYATRI, S. SAXENA, S. BASAK, S. K. CHATTOPADHYAY, A. ARPUTHARAJ and V. PRASAD, Hydrophobic functionalization of cellulosic substrates using atmospheric pressure plasma745-754
- DAISUKE ISHII, KEISUKE UEDA, PIETER STROEVE, TAKAHIKO NAKAOKI and HISAO HAYASHI, Transport properties of chemically crosslinked hydroxypropyl cellulose in solvated state755-760
- VIVIANE DA SILVA LACERDA, JUAN BENITO LÓPEZ SOTELO, ADRIANA CORREA-GUIMARÃES, PABLO MARTÍN-RAMOS, SALVADOR HERNÁNDEZ-NAVARRO, MERCEDES SÁNCHEZ-BASCONES, LUIS M. NAVAS-GRACIA, EDUARDO PÉREZ-LEBEÑA and JESÚS MARTÍN-GIL, Efficient microwave-assisted acid hydrolysis of lignocellulosic materials into total reducing sugars in ionic liquids761-770
- RYO HIYAMA, AKIRA HARADA, GISUSI SEIKI and KEN ORIHASHI, Ethanol production from unpretreated waste medium of shiitake mushroom (*Lentinula edodes*) by semi-simultaneous saccharification and fermentation under high substrate concentration conditions.....771-780

AMIT KUMAR, DHARM DUTT and ARCHANA GAUTAM, Pretreatment and enzymatic hydrolysis of pearl millet stover by multi-enzymes from <i>Aspergillus nidulans</i> AKB-25...	781-790
LIN MYAT and GI-HYUNG RYU, Optimization of enzyme dosages for hydrolysis of destarched corn fiber subjected to acid and alkaline pretreatments for improved fermentable sugar yield	791-802
SHANSHAN LIU and QIANG WANG, Response surface optimization of enzymatic hydrolysis process of wet oxidation pretreated wood pulp waste	803-809
BI RAN, SHAN HUANG and GUNNAR HENRIKSSON, Isolation of exceedingly low oxygen consuming fungal strains able to utilize lignin as carbon source.....	811-817
HUANHUAN DENG, HONGYU YAN, LEI BI, ZIYING GENG, XIAOMIN WU and GUANE YANG, Biotransformation characteristics of <i>Loranthus tanakae</i> by <i>Rhodopseudomonas palustris</i>	819-829
M. O. GUERRERO-PÉREZ, M. CALZADO, M. J. VALERO-ROMERO, J. RODRÍGUEZ-MIRASOL and T. CORDERO, Killing two birds with one stone: Catalysts prepared from biomass waste to be used for transformation of biomass waste	831-835
MÁRIA FIŠEROVÁ, ELENA OPÁLENÁ and MONIKA STANKOVSKÁ, Influence of beech wood pre-extraction on bleaching and strength properties of kraft pulps	837-845
CUI JUQING, HAN SHUGUANG, WANG YAN, ZHANG YANG, DENG YUHE, ZHOU HANDONG, ZHU SHANGWU and LU XIAONING, Improving soy protein adhesive with organic montmorillonite for poplar plywood	847-851
SHUAIYAN WANG, TAO HUANG, CHEN LAI, TINGFEI XI, SHIBO LIAO and FANG NAN, Oxidized nano-bacterial cellulose/silk fibroin composite films	853-862
NABAWIA MECI, RAMZI KHIARI, ELIMAME ELALOUI and MOHAMED NACEUR BELGACEM, Preparation of paper sheets from cellulosic fibres obtained from <i>Prunus amygdalus</i> and <i>Tamarisk</i> sp.	863-872
MOSTAFA ROHI, OMID RAMEZANI, MEHDI RAHMANINIA, SEYED MAJID ZABIHZADEH and MARTIN A. HUBBE, Influence of pulp suspension pH on the performance of chitosan as a strength agent for hardwood CMP paper	873-878
MING-SHIEN YEN, MU-CHENG KUO, CHIEN-WEN CHEN, JYH-HONG WU and JHENG-HONG WU, Synthesis of boehmite/organomodified montmorillonite composites by a hydrothermal method: Properties and use for coating cotton fabric	879-888
C. K. POON and C. W. KAN, Optimization of wrinkle resistant finishing with dimethyloldihydroxyethyleneurea (DMDHEU) using titanium dioxide as co-catalyst	889-894
