

CELLULOSE CHEMISTRY AND TECHNOLOGY

ADVANCES IN THE CHEMISTRY, PHYSICS AND TECHNOLOGY OF
POLYSACCHARIDES AND LIGNIN

59 ♦ 2025

9 -10 ♦ OCTOBER -
DECEMBER

C O N T E N T S

ALEKSANDR S. KAZACHENKO, ROMAN V. BORISOV, ANGELINA V. MIROSHNIKOVA, OLEG V. BELOUSOV, SERGEY V. BARISHNIKOV, ANDREY M. SKRIPNIKOV, OLGA S. SELEZNEVA, MAXIM N. LIKHATSKI and ANATOLY M. ZHIZHAEV, Facile hydrothermal synthesis of Pd, Ir, Pd-Ir particles on CMK-3 for reductive catalytic fractionation of birch wood959-969

MUHAJMIN and BAYU WIYANTOKO, Determination of glucose content in cellulose derived from banana stem (*Musa spp.*) using UV-Vis spectrophotometry and HPLC methods.....971-981

DAM XUAN THANG, NGO THUY VAN, PHAM THI THU GIANG and NGUYEN NGOC LINH, Optimized oxidative-alkaline treatment of AP1 ramie fibers for enhanced cellulose purity and tensile strength983-1003

TARO KINUMOTO, YUKINO MASUDA, KEISUKE TOJO, MIKI MATSUOKA and MASAYA MORIYAMA, Changes in solid-state cellulose nanofibers induced by gamma-ray irradiation: comparative evaluation of pure and lignin/hemicellulose-containing structures.....1005-1013

SHUBHAM KALAMKAR, ARPUTHARAJ ANTHONYSAMY, BHARIMALLA ASHOKKUMAR, CHARLENE D'SOUZA, RAJESH KADAM and VIGNESHWARAN NADANATHANGAM, Algal nanocellulose: a potential resource for advanced biomaterials.....1015-1031

AAMNA MAJEED, GULZAR MUHAMMAD, MUHAMMAD RAUF RAZA, MUHAMMAD AMIN, AROOJ AFZAL and REHANA BADAR, Arabinoxylan-mediated green synthesis of silver nanoparticles with enhanced antibacterial and dye degradation efficiency1033-1044

AVIKUMAR BAWANKAR and LAXMIKANT ZAWAR, Recent advances in phytochemical-based nanoparticles for colon-specific drug delivery	1045-1066
DAHAI QIU, YAO LI, JUN XU and ZULCAIF AHMAD, Nanoparticle loaded fast-dissolving microneedle patch for local delivery of anesthetic agent – dual-action approach.....	1067-1079
NISHI K. BHARDWAJ, PUNEET PATHAK, CHAKARVATI SANGO, ANSHUL SABHARWAL, RAJEEV K. KAPOOR and PRATYOOSH SHUKLA, Evaluation of recycling potential of virgin mixed hardwood pulp treated with cellulase and chemicals.....	1081-1091
SWATI DEVENDRA RAYSING and ASHISH PRAKASH GORLE, Development and optimization of a QBD-guided RPHPLC method for the quantitative determination of rutin in bulk and lipid-polymer hybrid nanocarriers	1093-1103
KOMAL IFTIKHAR, MUHAMMAD MOHSIN and AAMER KHAN, Synthesis of carbon black from post-consumer textile waste and its application in composites	1105-1119
SHETTAHALLI M. VINU KUMAR, RAVICHANDRAN A. THANGAVEL, RANGANATHAN SOUNDARARAJAN, CHANDRASEKARAN SASIKUMAR, ERUSAGOUNDER SAKTHIVELMURUGAN and CHINNASAMY NITHIYAPATHI, Evaluation of dynamic mechanical properties of flax fiber-polypropylene (FP) composites using the adaptive neuro-fuzzy inference system	1121-1132
BASHAR AL-OGAIDI, SHAYMAA M. SALIH, MOHAMMED KADHOM and MOHAMMED A. FAYAD, Evaluation of eco-friendly unsaturated polyester composites reinforced with agro-waste fillers	1133-1141
JAFREY DANIEL JAMES DHILIP, VIJAY RAGHUNATHAN, PANDIYAN G. KARTHIK, VINOD AYYAPPAN, SANJAY MAVINKERE RANGAPPA and SUCHART SIENGCHIN, Influence of polybenzimidazole nanofiller in pineapple fiber-based epoxy composites: tribological and optimization analyses	1143-1155
SHEILA SHAHIDI, HAKIMEH MOHAMMADBAGHERLOO, ZAHRA MOTAGHI and RATTANAPHOL MONGKHOLRATTANASIT, Synthesis, characterization and application of silica nanoparticles on cotton fabrics for enhanced flame retardancy and hydrophilicity.....	1157- 1165
JAMES VINCENT D.V. ANG, ALVIN KARLO G. TAPIA, CHRYSLINE MARGUS N. PIÑOL, NACITA B. LANTICAN, MA. LOURDES F. DEL MUNDO, RONNIEL D. MANALO and MARVIN U. HERRERA, Functionalization of cotton fabric with polyaniline emeraldine salt using silane aniline as coupling agent	1167- 1174
ZENGJIN FU, LEI TAN, YAN HAO and TINGRUI LIN, Synthesis and characterization of carboxymethyl cellulose-glutaraldehyde-La-graphene composite beads and their application for removal of methylene blue	1175-1187

BERLIAN SITORUS, MAHADI, RISYA SASRI, DIONISIUS RIO, INTAN SYAHBANU and SENO D. PANJAITAN, Fabrication of luminescent cellulose-based particles from sugarcane bagasse for Fe ³⁺ detection	1189-1197
NAZIHA LADJAL, SMAIL TERCHI, BAHRI DEGHEFEL and ABDELHAMID GUELIL, Cellulose-rich apricot stone shells as a sustainable biosorbent for efficient Crystal Violet dye removal: kinetic and thermodynamic insights	1199-1212
JIN-YING TONG, SIEW-TENG ONG and SIE-TIONG HA, Conversion of Kapok (<i>Ceiba pentandra</i> (L.) Gaertn) husks to an efficient adsorbent for Basic Blue 3 removal: batch adsorption and optimization studies	1213-1228
